Sample Questions to Ask Employers

Below are a few sample questions you could ask a potential employer. Don't limit yourself to these questions. Instead, think about what you know about the company, and ask questions related to your research of the organization. Employers are very impressed when job seekers have researched their company and ask good questions.

What are the primary responsibilities of **{job title}**?

Can you tell me more about the day-to-day responsibilities of **{job title}**?

What is the onboarding process like for new hires?

What do you think are the most important qualities for someone to excel as a(n) **{job title}**?

How does the position fit in relation to the rest of the organization?

What do you/employees like most about working at **{name of company/organization}**?

What could you tell me about the **{name of company/organization}** that isn't widely known?

Are there opportunities for professional development? If so, what do those look like?

What is the next step I need to take to apply (or stay connected)?

What are some other questions you could ask? Jot them down in the space below and review before walking up to the employer.
